

PowerStream List of FIT Applications

This document lists all current applications to connect renewable generation facilities to the PowerStream distribution system.

Note that only projects currently listed on the OPA database are included in this document. The FIT application date occurs when a Form B was received from the applicant and a Study Agreement was issued by PowerStream. The MicroFIT application date occurs when a Form C is received from the applicant.

This document will be updated each month. Please check at the end of this document for a glossary of terms.

The list was updated on February 1st 2012.

Project Number	Transformer Station (TS)	TS Owner	TS Feeder	Distribution (Municipal) Station	Distribution (Municipal) Station Feeder	Application Date	Nameplate Capacity (kW)
P1-256	MARKHAM MTS #1	PowerStream	22M1			25-Jul-2011	150

Glossary

Application Date – The date that a Form B was received from the applicant and a Study Agreement was issued by PowerStream.

Distribution (Municipal) Station – The name of the distribution station that has received an application to connect.

Distribution (Municipal) Station Feeder – The designation for the distribution (municipal) station feeder which received an application to connect.

Nameplate Capacity – The amount of generation that is proposed to be connected.

Transmission Station (TS) – The name of the transformer station that has received an application to connect.

TS Feeder – The designation for the transmission station feeder which received an application to connect.

TS Owner – The owner of the transformer station.
