

# Environmental Policy Statement

PowerStream is committed to environmental stewardship in all aspects of our business. As one of the largest local electricity distribution companies in Ontario, we accept responsibility and accountability in the environmental impacts of our operations in providing service to residential and business customers in our service territory.

Consistent with our goal to provide safe, reliable and efficient service to our customers, PowerStream promotes the development and application of procedures to minimize the ecological impacts of our operations as well as supporting environmental sustainability in both short and long term for our current and future generations.

## **PowerStream commits to:**

1. Meet and exceed, where practical and prudent, all environmental regulations set by legislation, government directives, and other environmental requirements to which PowerStream subscribes;
2. Continual improvement by establishing and maintaining an environmental management framework for setting and reviewing objectives and targets;
3. Work closely with all levels of stakeholders involved in our operations to reduce environmental impacts;
4. Involve all staff in the promotion and awareness of environmental issues through training and guidance;
5. Identify and investigate efforts to reduce pollution, waste and the consumption of resources;
6. Promote transparency through documenting and publishing our environmental performance;
7. Implement and maintain a Green procurement policy;
8. Green fleet management (emission reduction) through more efficient vehicle utilization, alternative fuels and hybrid vehicles where supported through operational processes.
