conditions, contaminates from these properties could enter the drinking water system when a property is not sufficiently protected. **Self- Assessed Survey** 

Property owners of properties built before 2014 and with a water service line entering their property that is 38 mm (1.5 inches) in diameter or smaller need to complete a Self-Assessed Survey once every 5 years. This will determine the level of backflow risk associated with your property. There is no cost for completing this survey.

By-law No. 10-103 ensures that the City of Hamilton's drinking water quality and distribution system is protected from each industrial, commercial, institutional or multi-residential property four stories or higher. Under backflow

#### **Cross Connection Survey**

Property owners with a water service line entering their property that is 50mm or larger or properties deemed to pose a significant risk are required to complete Cross Connection Survey.
